CC-130-BB

**CC-130-BB installed in a stock Harley
clutch basket**

Our CC-130-BB Fits all stock Harley clutch baskets 1998 to 2010

Included in the clutch pack are 7 kevlar fibers that have more than 60% more surface area than stock. Our "Patented" Ball Bearing Lock Up Pressure Plate will handle all stock application. For large motors, carbide balls may be necessary. CBB-8516 is a set of 8 carbide balls that can be used in place of the steel balls intermittently around the circle. Clutch pack is 1-Steel .120" thick . 6-Steels .059" and 7-Kevlar fibers
